LED moving-head washlight with 3 Watt-technology

JB-lighting created the first LED moving-head which light output is comparable to a 575W arcstream lamp.

JB-lighting combined the advantages of trend-setting LED-technology with some fifteen years of experience in developing intelligent lighting systems.

The result: a lightweight, compact washlight with brilliant colours, lightning fast colour changes and extremely low power consumption. The LEDs rated lifetime is 50.000 h and there are virtually no mechanical parts inside the head which makes the unit absolutely reliable.

The VaryLED is the first LED moving-head to be as bright as a moving-head with 575W arcstream lamp (except for white and yellow). It's low-noise operation makes it suitable for all kinds of application.

Technical specification:

Optics and light source

84 Luxeon LEDs
Rated lifetime 50.000h
10° beam angle
25° beam angle, optional

Effects

RGB colour mixing, lightning fast
Dimming independently from selected colour
Electronic dimming 0 - 100%
Electronic strobe with pulse and random effects

Control

DMX-512
15 DMX-channels
Pan/Tilt movement 8bit or 16bit
Stand-alone mode

Power consumption and mains supply

Max. 250 V
115V, 230V; 50 - 60 Hz

Construction

Aluminium die-casting body
Convection cooled, silent airflow system activates only when needed
Camloc-connector for comfortable mounting; mounts in any position
3pin and 5pin XLR connectors
weight 10,5 kg
