

SMOKE FACTORY

FOG AND HAZE GENERATORS

Prolight + Sound 2009, Frankfurt, Hall 9.0 B 20

SPACEBALL II

Hightech in a little Box. Ideal for small and medium jobs, dry hire, party, Top 40, mobile DJ.

Small and compact, but packed with latest digital technology: DMX, microprocessor, timer, digital display. Reasonable output but low power consumption. Flightcase included.

- Vaporizing Fog Generator
- 240 V/ 50 Hz/ 650 W
- Weight (without fluid): 9 kg
- Fluid tank/bottle: 750 ml
- Fog time: ca. 35 sec. (100% output)
- continuous <50%
- DMX 512, 0-10V, timer, stand alone
- Warm up time: ca. 7 minutes
- mikroprozessor-controlled

TOURHAZER II

New features: The air lead is adjustable now, the fan got a new mounting, and the air pump can be controlled with the output slide. The effect is an even more reduced noise on low output, which was a demand of TV-studios and theatres in difficult low-noise applications.
